

DAM 35 - flex flat Service Machine

The automated DAM 35 flex flat 2-in-1 clipping and stripping machines allow even medium and smaller spinning mills to clip and strip theirs on aluminum or cast iron bars economically, efficiently and with the highest precision. DAM 35 flex flat delivers a stable carding gap and allows a fast changeover.

Technical data

- Compressed air pressure: 5-6 bar
- Rating drive motor: 0.74 kW
- Speed of mounting slide: 4m/min
- Weight: 650 kg

Product details

- Fully automatic and upgraded clipping and stripping process
- Multi-flat design roll for all kinds of flat bars
- Extremely sturdy construction with ground guide beams
- Clipping rails equipped with electro-pneumatically operated roller units for the flat type in question
- Vertical clamping of the flat clothing by 6-pressure cylinders
- CE conformity

Customer advantages

- Contributes to precise & stable carding gap
- 2-in 1 machine for stripping & clipping flexible flats of any kind
- Fast changeover from one flat type to another
- Safe workplace

DAM 35 - flex flat Service Machine

Basic equipment

Item No 110.524

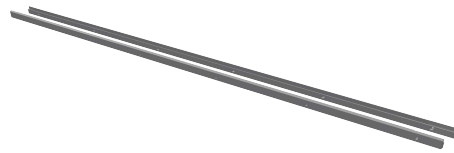

- Complete equipped DAM 35
- Pair Clipping rails for one card type
- Various mounting tools
- Wear and tear parts for 2 - 3 years

Add equipment card-specific

Item No 110.525

- Additional pair of clipping rails card specific

Optional

Item No 00501500

- Measuring beam incl. card specific support plates (one pair) and a digital dial gauge with transmitter and receiver

*Item No 110.939

- Card specific pair of support

Please indicate power supply and exact card type when you order

*Special grinding/support plates
needed for; Rieter C60 - C77
Rieter C80 - C81
Crosrol MK4 - MK5
Crosrol MK6 - MK7
